1. Overview

1.1 Background

Punjab National Bank (International) Limited ('the Bank') is a UK incorporated subsidiary of Punjab National Bank – India, and is authorised by the Prudential Regulation Authority (PRA) and regulated by the Financial Conduct Authority (FCA) and the Prudential Regulation Authority (PRA). The Bank started its UK operations in May 2007 and currently operates in the United Kingdom through a network of seven branches. While the Central London branch caters mainly to corporate clients, all other branches focus on retail and business clients.

This document details the Pillar III disclosure requirements and is in addition to the consolidated Basel III - Pillar 3 disclosures made by Punjab National Bank Limited ('the Parent Bank').

1.2 Media and Location

The Annual Report and the Pillar III disclosures will be published on the Bank's corporate website (www.pnbint.com).

1.2 Basis of disclosure

The Bank's Pillar 3 disclosures comply with the requirements of CRD IV, specifically part eight of the CRR which sets out the minimum disclosure requirements. In accordance with Article 432 of the CRR, the Bank is permitted to exclude certain disclosures if they contain proprietary information or are nonmaterial.

The Pillar 3 disclosures have been prepared for explaining the basis on which the Bank has prepared and disclosed certain capital requirements and information about the management of certain risks. These disclosures are intended to convey the Bank's risk profile comprehensively to market participants. Some of the information required to be declared as part of the Pillar 3 disclosures is discussed in various notes to the financial statements, and in the Directors' and Strategic Reports in the Annual Report. This report should be read in conjunction with the Annual Report and Financial Statements for completeness of the required disclosures.

1.3 Scope of Application

The Pillar 3 disclosures have been prepared for the Bank as per the rules laid out in the CRDIV guidelines as adopted by the PRA and have been approved by the Board. The Bank is a full CRD compliant firm and its accounting and disclosures are on a solo basis. There is no subsidiary/joint venture of the firm that is required to be consolidated for accounting or prudential purposes. However, its Parent, Punjab National Bank, has to consolidate financial statements, capital adequacy and other information required for accounting, prudential and market disclosure purposes, and reports the same to its regulators and market participants on a consolidated basis.

1.4 Frequency

This disclosure is made on an annual basis. The disclosures will be as at the Accounting Reference Date (ARD), i.e. as at March 31st, and will be published alongside the Annual Report.

1.5 Currency

The Pillar III disclosures are presented in US Dollars as this is functional currency of the Bank.

2. Risk Management

Effective risk governance is the key component of the Bank's strategy and it helps in delivering the objectives of Bank's overall business strategy. The overall business model of the Bank is supported by an embedded risk culture and sustainable risk appetite.

Further details on our risk management objectives, policies, governance and risk appetite framework are set out in note 41 'Financial risk management objectives and policies' of our Annual Report and Financial Statements 2021.

The Own funds disclosure template is provided in Annexure I and disclosure on main features of the capital instruments is provided in Annexure II.

4. Capital Requirements

4.1. Approaches to assess minimum capital requirement under Pillar 1

The Bank determines its Pillar 1 regulatory capital requirement based on the following approaches:

- ❖ **Credit Risk:** Standardised approach
- ❖ **Market Risk:** Standardised approach
- ❖ **Operational Risk:** Basic Indicator approach

Besides, capital requirement on the following is also included in Pillar 1 requirements:

- ❖ Counterparty credit risk (CCR): Mark to market method/potential future exposure
- ❖ Credit valuation adjustment (CVA) risk: Standardised method
- ❖ Settlement / Delivery risk: Price Difference method

The capital requirement for all the above risks is then aggregated to arrive at the minimum capital requirement under Pillar 1.

5.4 LR Qua: Qualitative Disclosure on Management of Leverage Ratio

1	Description of the process used to manage the risk of excessive leverage	Leverage is managed within the Bank's Risk Appetite Framework and the Bank demonstrates a low-risk appetite with a leverage ratio of 17.3%.
2	Description of the factors that had an impact on the leverage ratio during the period to which the disclosed leverage ratio refers	During the course of the financial year, the leverage ratio has decreased from 20.4% at 31 st March 2020 to 17.3% as at 31 st March 2021. The decrease in the ratio is primarily due to reduction in Tier 1 capital combined with an increase in exposures.

6. Asset Encumbrance

Asset encumbrance arises from collateral pledged against secured funding and other collateralised obligations. As at 31st March 2021, the Bank has no encumbered assets (2020: Nil). The tables in Annexure III include all relevant disclosures in relation to encumbered and unencumbered assets.

7. Liquidity:

Liquidity risk is the possibility of being unable to meet present and future financial obligations as they become due. The Bank has implemented CRDIV liquidity guidelines as specified by the PRA. It maintains a Liquidity Coverage Ratio (LCR) as stipulated by the PRA. The Bank also tracks the Net Stable Funding Ratio (NSFR), though it is yet to be introduced as a regulatory requirement.

Key Liquidity Metrics	2021	2020
Liquidity Coverage Ratio (LCR)	748%	403%
Net Stable Funding Ratio (NSFR)	146%	126%

8. Credit Risk: General Disclosures

8.1 Qualitative Disclosures

Credit Risk Management Policy

Credit risk is defined as a potential financial loss on account of delay or denial of repayment of principal or interest with respect to a credit facility extended by the Bank, both on and off-balance sheet. Credit risk can also arise on account of downgrading of counterparties to whom credit facilities are extended or whose credit instruments the Bank may be holding, causing the value of those assets to fall. Risks arising from adverse changes in the credit quality of borrowers or general deterioration in the economic conditions under which these counterparties operate could also affect the recoverability and value of Bank's assets and therefore its financial performance.

The following measures are in place to mitigate the credit risks:

- The Bank has a Credit Risk Management Policy, Risk Appetite Framework & Collateral Management Policy in place for management of Credit Risk.
- Every credit facility (except loans secured by fixed deposits and staff loans) is sanctioned by the Credit Approval Committee at the Corporate office.
- Credit risk is independently assessed by Centralised Credit Appraisal team on financial & non-financial parameters and challenged by the Credit Approval Committee before sanction.
- Concentration risk as per parameters defined in Risk Appetite Framework are considered, both with respect to individual or group exposures as well as industry/sector wide or country wide exposures.
- Most of the facilities are secured by tangible securities with the bank having a low threshold for undertaking unsecured exposure as defined in the Risk Appetite Framework.
- Centralised Credit Administration Department for better control over post sanction activities.
- Periodic review and monitoring of facilities is undertaken to identify and attend to any observed weakness in any facility.
- All facilities above prescribed threshold limits are reported to the Board from time to time.
- Lending policies and limits are periodically reviewed by the Board.

Internal Ratings

The Bank has in place internal rating and scoring models. All eligible non-bank credit counterparties are rated on these models. Rating/scoring is given on various financial and non-financial parameters such as financial strength, creditworthiness and repayment capacity of the borrower. Internal ratings/scorings are used while taking credit decisions.

For further information, see note 25 'Exposure to credit risk and availability of collateral security' of the Annual Report and Financial Statements 2021.

v. Exposure value subject to credit risk analysed by Credit Quality Step (CQS):

The Bank uses credit ratings provided by external credit rating agencies. There has been no change in the usage of these ratings from last year. The Bank assigns each of its exposures to one of the CQS with reference to relevant issuer and issue credit assessments. Risk weight percentage are then determined with reference to exposure class, CQS, and maturity of the exposure.

Types of exposure for which each agency is used as below:

- Specific product rating if available.
- General Long Term/ Short Term rating for long term /short term exposure respectively if no specific product rating.

Credit quality assessment scale as prescribed in supervisory statement SS10/13 by PRA is being followed. Further guidelines by PRA/EBA as and when issued/ revised, will continue to be followed.

The following tables detail the standardised credit risk exposures by CQS for significant asset classes. All exposures are stated after specific impairment provisions and post application of credit risk mitigation (CRM) techniques with substitution effects on the exposure and after application of any conversion factors (CCF).

9. Credit Risk Mitigation: Disclosures for Standardised Approach

Policies and processes for, and an indication of the extent to which the Bank makes use of, on and off-balance sheet netting;

➤ Policies and processes for collateral valuation and management

The Bank has in place a 'Collateral Management Policy' which is used for collateral valuation and management. The collateral management policy addresses the following basic objectives of credit management:

- ❖ Mitigation of credit risk & enhancing awareness on identification of appropriate collateral
- ❖ Optimising the benefit of credit risk mitigation in computation of Capital Charge
- ❖ Mitigation of risks attendant to the use of credit Risk Mitigation techniques

➤ **A description of the main types of collateral taken by the Bank**

Deposits kept with us and deposits kept with parent against our exposure are the only collateral treated for credit risk mitigation. For deposits with the parent, equivalent exposure is treated to be an exposure with the parent. The Bank has a netting agreement with the parent, under which exposures with the parent are netted, and risk weights are only applied on the remaining exposure. The Bank has also put in place limits on net exposure to the parent and operates within those limits.

➤ **The main types of guarantor counterparty and their credit worthiness**

For mitigation purposes, only guarantees/Stand-by letters of credit (SBLC) issued by banks are treated as guarantees. No other guarantee is recognised for the purpose of risk mitigation. For guarantees/SBLC issued by banks, exposure is shifted to that bank.

➤ **Information about (market or credit) risk concentrations within the mitigation taken**

Except deposits (with us or the parent), SBLC's (primarily with Indian banks) are the only risk concentrations within the mitigation taken.

10. Securitisation Exposures: Disclosure for Standardised Approach

There is no securitisation exposures of the Bank.

11. Market Risk in Trading Book

11.1 Qualitative disclosures

The general qualitative disclosure requirement for market risk, including the portfolios covered by the standardised approach:

The Bank's trading book Portfolio includes US treasury securities; this portfolio is subject to mark to market which is recognised through profit and loss. Capital charge for Interest rate risk is arrived at by standardised approach.

11.2 Quantitative disclosures

As at 31st March

(Figures in Million)

Particulars	2021		2020	
	Risk Weighted Assets	Capital Requirement @ 8%	Risk Weighted Assets	Capital Requirement @ 8%
i) Interest Rate Risk	0.3	0.0	18.8	1.5
ii) Foreign Exchange Risk	10.7	0.9	7.1	0.6
iii) Total capital charge for market risks under Standardised duration approach (i + ii)	11.0	0.9	25.9	2.1

12. Operational Risk

Operational risk is calculated by Basic Indicator Approach method.

As at 31st March

(Figures in Million)

Particulars	2021		2020	
	Risk Weighted Assets	Capital Requirement @ 8%	Risk Weighted Assets	Capital Requirement @ 8%
Total capital charge for Operational risk	44.9	3.6	50.6	4.0

13. Interest Rate Risk in the Banking Book (IRRBB)

13.1 Qualitative Disclosures

Key assumptions, including assumptions regarding loan prepayments and behaviour of non-maturity deposits, and frequency of IRRBB measurement.

A two percent shift either way is considered for arriving at interest rate risk in the banking book. Assets and liabilities on floating rate of interest are placed as per the next interest rate reset date. Those with fixed rate of interest are placed as per the contractual maturity date. Assets/ liabilities not sensitive to rate of interest are treated as non-sensitive for the purpose of this calculation. Non-performing assets are also treated as non-sensitive. Non maturity deposits are placed in the first bucket. IRRBB is measured on a monthly basis. The risk calculated on this account is treated as a Pillar 2 risk and capital is provided accordingly.

13.2 Quantitative Disclosures

The tools used is Earning Approach – (Interest rate sensitivity Statement - Net Gaps)

The impact of change in rate of interest on the economic value of assets and liabilities including off balance sheet items is analysed under this approach. The position as of Interest Rate Gap is as below:

*RSA: Rate Sensitive Assets, RSL: Rate Sensitive Liabilities, IRS: Interest Rate Swaps

The impact of interest variation by 2% is calculated and treated as a Pillar 2 requirement of capital. Most of our liabilities are at fixed rate of interest and any change in interest is not applicable to liabilities contracted in past. Most of our loans and advances are at floating rate of interest. The floating component is linked to LIBOR or Bank of England base rate, and a fixed spread over that rate is charged to the customers. Therefore, the impact on the Bank is mostly limited to variation in LIBOR/Bank of England base rate.

As a prudential measure, a limit has been fixed for impact on economic value of equity and the same is monitored on a regular basis.

14. General Disclosure for Exposures Related to Counterparty Credit Risk (CCR)

14.1 Qualitative Disclosures

The general qualitative disclosure requirement with respect to derivatives and CCR methodology used to assign economic capital and credit limits for counterparty credit exposures is as below:

The Bank uses forex swaps and interest rate swaps as derivatives in our books. No derivatives are entered for clients. Forex swaps are entered to cover own positions. Similarly, interest rate swaps are also entered to minimise own interest rate risk in the banking book. Capital for Counterparty Credit risk is provided on exposure value of forex swaps and interest rate swap arrived at by adding positive mark to market value with potential future exposure at prescribed rates as per maturity of the contract. Besides, interest rate risk is also provided for interest rate swaps under standardised method. Further, Credit Valuation adjustment (CVA) on derivatives is being calculated based on the standardised approach. Counterparty exposure for a security financing transaction is arrived at by netting the amount of securities lent from the secured financing obtained. The present exposure is nil.

Policies for securing collateral and establishing credit reserves:

Not applicable

Policies for netting of counterparty credit exposures:

The Bank mitigates the credit risk of derivatives by entering into International Swaps and Derivative Association (ISDA) master netting agreements. Under these agreements, when a credit event such as a default occurs, all outstanding transactions under the agreement are terminated, the terminal value is assessed and only a single net amount is due or payable in settlement of all transactions. The Bank's sale and repurchase transactions are also covered by master agreements with netting terms similar to ISDA master netting agreements. The ISDA and similar master netting agreements create for the parties to the agreement a right to the set-off of recognised amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Bank or the counterparties or following other predetermined events.

Discussion of the impact of the amount of collateral the Bank would have to provide given a credit rating downgrade.

Not applicable

14.2 Quantitative Disclosures

- a) Gross positive fair value of contracts, netting benefits, netted current credit exposure, collateral held and net derivatives credit exposure.**

b) As at 31st March

(Figures in Million)

	Positive Mark to Market Value	Potential Future Exposure	Total Exposure	Positive Mark to Market Value	Potential Future Exposure	Total Exposure
Forex Swaps	1.8	1.3	3.2	3.0	1.5	4.5
Total	1.8	1.3	3.2	3.0	1.5	4.5

Credit Valuation Adjustment (CVA) risks on counterparty is \$0.6 million.

c) Credit derivative transactions that create exposure to CCR: Nil

d) Hedging Policy:

The Bank does not deal in derivatives for customers. Derivatives are used for hedging own positions. Currency swap and interest rate swap are the major derivatives used by the Bank. Similarly, the Bank has entered into currency swaps to mitigate forex risk, while managing its funds mismatch in different currencies.

15. Remuneration Policy:

The PRA has defined certain requirements relating to remuneration, referred to as the Remuneration Code (“the Code”). Firms that fall within the scope of the Code (which includes banks) must establish, implement and maintain remuneration policies, procedures and practices that are consistent with, and promote, sound and effective risk management.

The Bank’s Remuneration Policies are designed to comply with the Code and the Bank is committed to adherence to its practices and guidelines in respect of Code Staff.

The Chairman of the Board and one of the Non-executive directors are from Parent Bank and the Bank doesn’t pay any remuneration to them. The Managing Director is a Parent Bank Appointee on a secondment basis and his remuneration is guided by a Standing Committee set up by Government of India for determining salary and other service conditions of officers of public sector banks posted abroad. Two independent Non-Executive Directors are paid fixed fees and allowances per annum. The other executive director and Key persons are on special contract or negotiated pay, which is annually reviewed by The Nomination and Remuneration Committee.

Other than Director’s remunerations, the Bank has two pay groups of employees in UK – those on secondment to the Bank from the Parent Bank and those who are locally recruited. The employees on secondment are governed by the salary structure approved by the Standing Committee set up by Government of India for determining salary and other service conditions of officers of public sector banks posted abroad; as well as by the Board of Directors of the Parent Bank. Their salary, perquisites

and allowances are fixed accordingly and include certain fixed net of tax basic pay, payment of tax and NI and reimbursement of furnished accommodation, utility bills, telephone, newspaper and medical expenses. Salary to the locally recruited staff is as per Board approved Human Resource (HR) Policy. HR policy of the Bank is approved by the Board on recommendation of the audit and compliance committee of the Board.

Bank has its independent back office in India. At the Back Office, there are two groups of employees. Senior officers are on deputation from the Parent Bank and are paid salary as per the salary structure of nationalised banks in India. In addition, each of them is paid a deputation allowance. Junior staff are on contract from an employee management agency and are treated as employees of the contractor.

None of the employees of the Bank falls in the category of high earners. As a matter of policy, the Bank does not pay any bonus to its employees. There is no deferral policy. There is no variable pay. All employees are paid annual increments as per their scale of pay.
